

About Samsung Medison CO., LTD.

Samsung Medison, an affiliate of Samsung Electronics, is a global medical company founded in 1985. With a mission to bring health and well-being to people's lives, the company manufactures diagnostic ultrasound systems around the world across various medical fields. Samsung Medison has commercialized the Live 3D technology in 2001 and since being part of Samsung Electronics in 2011, it is integrating IT, image processing, semiconductor and communication technologies into ultrasound devices for efficient and confident diagnosis.

* This product, features, options and transducers are not commercially available in all countries.

* Due to regulatory reasons their future availability cannot be guaranteed.
Please contact your local sales network for further details.

* All of the products in this catalog are medical devices, please read the user manual carefully before use.

* S-Vue Transducer™ is the name of Samsung's advanced transducer technology.

* Prestige is not a product name but is a marketing terminology.

* Elite is a package for WS80A and not a particular function.

* Prime is a package for HS70A and does not refer to any particular function.

* Plus is a package for HM70A and does not refer to any particular function.

* The Built-in Chair (iChair) displayed with HERA I10 is an independent product designed to be compatible with HERA I10.

1. Optional feature which may require additional purchase.

2. S-Detect™ for Breast and S-Detect™ for Thyroid are not available in Canada. In the United States, the Margin, Posterior Features, and Echo Pattern, the classification items of S-Detect for Breast are manual, thus these classification items are not automatically provided. Also the recommendations about whether results are benign or malignant are not applicable.

3. Strain value for ElastoScan+™ is not applicable in Canada and the United States.

4. SonoSync™ is an image sharing solution, not a diagnostic solution.

5. NerveTrack™ requires purchase after a certain period of time for a continuous usage. Please contact the sales representative for details.

Women's Health

HERA, an acronym stands for Hyper-aperture and Enhanced Reconstruction Architecture, is Samsung's new preeminent ultrasound platform committed to delivering astonishing images and state-of-the-art ergonomics with simple yet ingenious look for the satisfaction in medical care.

X10 Data Transfer Rate*
for fast frame rates

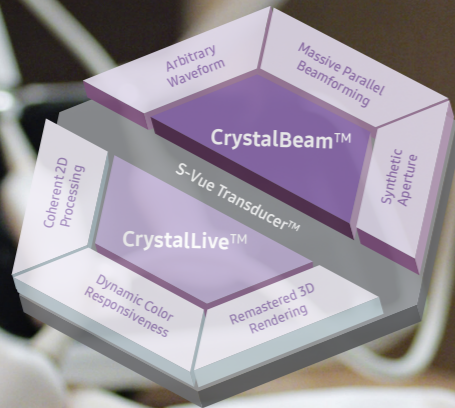

X11 Processing Power*
for high-quality images

X3 GPU Memory*
for fast rendering

Crystal Architecture™

* HERA W10/I10 compared to the Samsung WS80A

ShadowHDR™

Selectively applies high-frequency and low-frequency of the ultrasound to identify shadow areas such as fetal head or spine where attenuation occurs.

LumiFlow™

Visualizes blood flow in three dimensional-like to help understand the structure of blood flow and small vessels intuitively.

CrystalVue Flow™

Volume rendering technology provides blood flow morphology based on the CrystalVue™ feature that visualizes the internal structures by projecting the 3D data, providing better understanding in the anatomic structures and surrounding vascular vessels.

CrystalVue™

Advanced volume rendering technology that enhances visualization of both internal and external structures in a single rendered image.

MV-Flow™

Visualizes microcirculatory and slow blood flow to display the intensity in color. It is suitable for observation of microcirculatory and volume of slow blood flow.

BiometryAssist™

Measures the fetal growth parameters such as BPD, HC, AC, FL, and HUM with one click while maintaining exam consistency.

HERA W10

New Momentum of Imaging

HERA W10, the premier model of the HERA platform, will help you get more insight in diagnosis with its intuitive visualizations, precise analytic features, and instant operation. It is our commitment for Obstetrics and Gynecology applications to support for life-long healthcare of women, diligently pursuing for new possibilities in ultrasound diagnosis.

HERA W9

Pursuit of Excellence

Meet the new premium women's ultrasound designed to elevate confidence and efficiency in women's healthcare. The new HERA W9 ultrasound system combines superior imaging technology with ergonomic design to advance workflow. Featuring the innovative Crystal Architecture™ and premier image processing technologies, HERA W9 produces realistic, high-resolution images for exceptional accuracy.

HERA I10

Ultrasound Reimagined

With the introduction of the HERA I10, ultrasound hasn't just been redesigned, it has been reimagined. With input from clinicians and patients, HERA I10 transforms and elevates the ultrasound experience from each user's perspective. A new form factor, a combination ultrasound system with Built-in Chair, allows for a more comfortable environment with refined imaging technologies for increased diagnostic confidence.

Radiology

Samsung's ultrasound system for radiology is an integrated solution engineered to offer healthcare professionals a new and outstanding experience in diagnosis. It delivers exquisite image quality and expert tools to help make confident decisions.

X4 Data Transfer Rate *
for fast frame rates

X4 Processing Power *
for high-quality images

X2 GPU Memory *
for fast rendering

Crystal Architecture™

* RS85 Prestige compared to the Samsung RS85 V1.0

EzHRI™

Provides HRI ratio to quantify steatosis of a liver by comparing echogenicity between liver parenchyma with renal cortex.

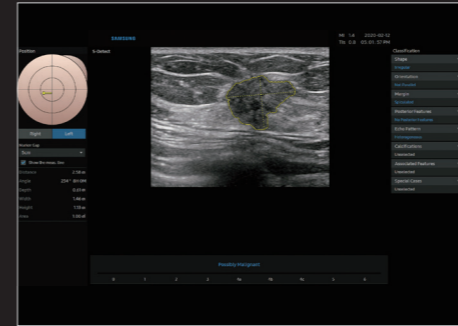

LumiFlow™

Visualizes blood flow in three dimensional-like to help understand the structure of blood flow and small vessels intuitively.

S-Shearwave Imaging™

Allows for non-invasive assessment of the stiffness of tissue/lesions in various applications such as breast, liver, MSK and prostate.

S-Detect™ for Breast²

The feature, which analyzes selected lesions in the breast ultrasound study and shows the analysis data, applies BI-RADS ATLAS* to provide standardized reporting.

S-Fusion™ for Prostate

Allows precise targeting during prostate biopsies. Based on 3D models created with MR data sets, S-Fusion™ for Prostate provides biopsy guidance to help safely navigate and target the prostate.

MV-Flow™

Visualizes microcirculatory and slow blood flow to display the intensity in color. It is suitable for observation of microcirculatory and volume of slow blood flow.

RS85 Prestige

The Real Revolution

RS85 Prestige has been revolutionized with novel diagnostic features across each application based on the preeminent imaging performance. The advanced intellectual technologies are to help you confirm with confidence for challenging cases, while the easy-to-use system supports your effort involved in the routine scanning.

Extensive Care

We continually enhance the image quality, specialized features, and ergonomics to conduct a wide range of exams including general imaging, women's health, cardiovascular, musculoskeletal, etc. from the routine to the complex. Discover its astounding capabilities for efficient and effective care.

ElastoScan™³

A diagnostic ultrasound technique for imaging elasticity, ElastoScan™ detects the presence of solid masses in tissues and converts any stiffness into color images.

LaborAssist™

A function that provides information of the progress of delivery by the automatic measurement of AoP (Angle of Progress) and the direction of the fetal head.

NeedleMate+™

With pinpoint precision, NeedleMate+™ delineates needle location when performing interventions such as nerve blocks. Improved accuracy and efficiency in procedure are possible with beam steering added to NeedleMate+™.

RealisticVue™

displays high resolution 3D anatomy with detail and realistic depth perception. User selectable light direction creates intricately graduated shadows for better defined anatomical structures.

Strain+

A quantitative tool for measuring global and segmental wall motion of the left ventricle (LV). Three standard LV views and a Bull's Eye are displayed in a quad screen.

HQ-Vision™

Provides clearer images by mitigating the characteristics of ultrasound images that are slightly blurred than the actual vision.

HS70A with Prime Daily Inspiration

Boost diagnostic accuracy to new heights with the Samsung ultrasound HS70A with Prime. Its superior imaging performance, specialized features, and accurate quantification tools enable you to conduct a wide range of general imaging exams, from the routine to the complex.

SonoSync™

Real-time Collaborative Solution

SonoSync™ is Samsung's innovate ultrasound live streaming solution that lets you share high-quality ultrasound images on PC, smartphone and other mobile devices for instant collaboration, guidance and training. Use the voice chat and real-time marking or more efficient communication and monitor multiple ultrasound images on a single screen with the multi view.

* SonoSync™ is an image sharing solution, not a diagnostic solution.

Secure Your Care

Samsung Healthcare Cybersecurity

Bringing peace of mind to your hospital and patients
To address the emerging need for cybersecurity, Samsung provides a solution to support our customers by offering the tools to protect against cyberthreats that may compromise invaluable patient data and ultimately degrade the quality of care. Samsung's Cybersecurity Solution strives to abide by the CIA triad (Confidentiality, Integrity, and Availability) and takes a comprehensive approach to providing impeccable protection with the following pillars: Intrusion Prevention, Access Control, and Data Protection.

Intrusion Prevention

Tools for protecting against cyber threats from external attacks

Security tools
(Anti-virus & Firewall)
Secured operating system

Access Control

Strengthened surveillance for tracking the access of patient information

Account management
Audit trail

Data Protection

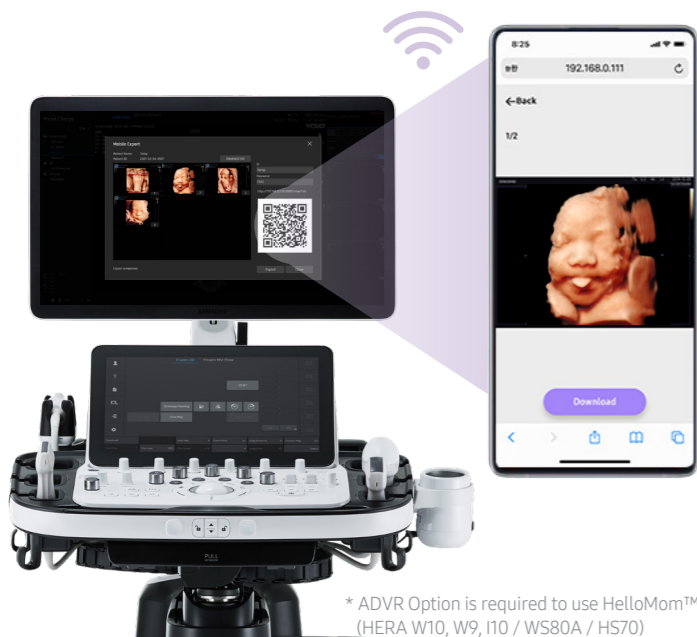

Encryption functions for safeguarding data whether at-rest or in-transit

Data encryption
Transmission security

HelloMom™ Simple Transfer of Fetal Images and Clips

HelloMom™ is a simple and secure image sharing solution that generates a QR code for the selected fetal images to be transferred. HelloMom™ allows pregnant women and their family to download fetal ultrasound images simply by scanning the QR code with their smartphones, reducing the hassle of installing a separate application.

* ADVR Option is required to use HelloMom™
(HERA W10, W9, I10 / WS80A / HS70)

Samsung Education Center Closer to Your Ultrasound System

We have designed the education center so that every customer, from those who purchase our system for the first time to those who are experts, can get a step closer to the product. Members will be able to increase their understanding of products and features through constantly updated contents.
